Final Year Project

Topic   : College Automation System
Description   : This is a Web Based Software for a College. This will keep details of all the Departments, Classes, Teachers, Students in addition to that Attendance and Marks of all the Students of different Semesters and Departments.

This software will be implemented via World Wide Web. And it will contain various Portals for different Objects in which they will be working.

Other Skills and Achievements

- Apart from software & website development, I have interest in creative designing too. I have designed posters, banners, visiting cards, etc.
- I have also designed many websites like website for our college technical festival, my personal websites, website for some organisations etc.
- I have also designed our College Automation System and Website.
- Apart from studies I was Student Representative for my batch in my engineering. I was also Technical Secretary of our college in my final years.
- I also organized many events like technical festival, cultural festival, etc of our college.
- I was also in the technical team for designing our college's E-Magazine.
- I am also working as Freelancer for Software & Web Designing and Development.
